

Recertification: Professional Certification in Agile & Scrum

Upon successful completion of the Certificate in Agile Management program's three (3) required courses and comprehensive final exam, you will attain the **Professional Certification in Agile & Scrum (PCAS)** credential from Villanova University.

Recertification will be required every three years and a \$50 recertification fee will apply. Please note the Villanova courses permitted toward your recertification. A minimum of eight Continuing Education Units (CEUs) need to be earned toward recertification. Courses must be taken after earning your PCAS certification.

Re-certification policy: A six-month grace period from the date of credential expiration is granted to earn the CEUs. Once the recertification period and grace period have elapsed, students are required to retake and pass the certification exam in addition to earning the required CEUs for recertification.
